

Session 1

Case Study 1: Michael

Background

Michael has been in your practice since birth.

Presents to your office in early September.

- 14 months old.
- Good health; no known medical conditions.
- Exposed to chickenpox at age 11 months; given varicella immune globulin within 24 hours of exposure.

Vaccination History

Pediarix (DTaP-IPV-Hepatitis B) at 6, 10, and 16 weeks

Hib at 6, 10, and 16 weeks

PCV at 6, 10, and 16 weeks

Questions

1. What vaccines does Michael need today?
2. When should he return for his next vaccinations?
3. What vaccines will he need when he returns?
